MEMORANDUM FOR THE RECORD

SUBJECT: [REDACTED]

25X1

REFERENCE: Memorandum from PSD, PSD-40/67 Dated 23 February 1967

Upon consultation [REDACTED] Chief, PLB/PSD, it was determined that the serious printing problem anticipated by the lab if Aero Direct Duplicating film type [REDACTED] were adopted for permanent use can be substantially reduced by two corrective procedures.

1. The head and tail idents of each roll of this material produced should contain the following information: "Direct Reversal Material, Enlarge Through Base/Contact Print Emulsion to Emulsion."

2. The material should be wound in such a manner at the processing site that it is immediately compatible with the photo lab's enlarging machines upon arrival at the NPIC.

Conclusions: The DN(3rd) was picked ^{to have sharper} over the DN(2nd) in every instance even though ^{as contribution factors} it was noted that the DN(3rd) had a higher contrast and was grainier. It was felt by some that the DN(2nd) was out of focus.
